Preface xix

Workshop Participants and Contributors to this Volume xxi

Chapter 1 Sulphur Isotopes in Nature and the Environment: An Overview **1**
H.G. Thode
1.1 Introduction 1
1.2 Theory and measurement of isotope effects 2
1.2.1 Equilibrium isotope effects 2
1.2.2 Kinetic isotope effects—isotope fractionation in unidirectional process 5
1.2.3 Fractionation factors 6
1.3 Sulphur isotope variations in nature 8
1.3.1 Biological sulphur cycle 9
1.3.1.1 Isotope fractionation by assimilatory reduction of sulphate 10
1.3.1.2 Isotope effects in the dissimilatory reduction of sulphate 11
1.3.1.3 Isotope fractionation during oxidation of sulphide 12
1.3.2 The marine sedimentary cycle 14
1.3.3 Fossil fuels 15
1.4 Sulphur isotopes in the atmosphere 16
1.5 Rain water 19
1.5.1 Ocean sulphate in rain water 19
1.6 Lakes and rivers 20
1.7 Vegetation 20
1.8 Applications 21

Chapter 2 Oxygen Isotope Fractionation for Understanding the Sulphur Cycle **27**
B.D. Holt and R. Kumar
2.1 Introduction 27
2.2 Bases for the use of oxygen isotopy 27
2.2.1 Sulphate–water isotope exchange 28
2.2.2 SO_2–water isotope exchange 28
2.2.2.1 Aqueous systems 28
2.2.2.2 Systems with no liquid water 29
2.2.3 $\delta^{18}O$ values of SO_2 oxidants and of associated water 32
2.2.4 Rapid hydration of SO_3 32
2.2.5 Sulphide oxidation 32
2.2.6 Bacterial SO_4^{2-} 33
2.2.7 Sulphate crystallization 33
2.3 Applications of ^{18}O studies to environmental sulphates 34
2.3.1 Atmosphere 34
2.3.1.1 Precipitation sulphates 34
2.3.1.2 Aerosol sulphates 36
2.3.1.3 Sulphur dioxide 37
2.3.2 Hydrosphere 37
2.3.2.1 Oceans 37
2.3.2.2 Streams and lakes 38
2.3.2.3 Ground waters 38
2.3.3 Lithosphere 38
2.4 Conclusions 39

Chapter 3 The Isotopic Analysis of Sulphur and Oxygen **43**
C.E. Rees and B.D. Holt
3.1 The isotopic analysis of sulphur 43
3.1.1 Introduction 43
3.1.2 The chemical pretreatment of sulphur samples 43
3.1.2.1 Introduction 43
3.1.2.2 The conversion of barium sulphate to silver sulphide 44
3.1.2.3 Sulphur in the atmosphere and in water 44
3.1.2.4 Sulphur in vegetation, soils, and sediments 45
3.1.2.5 Sulphur in petroleum, coal, and sulphur ores 47
3.1.3 The preparation of sulphur samples for mass spectrometry 48
3.1.3.1 Introduction 48

3.1.3.2 Combustion of sulphides in oxygen 48
3.1.3.3 Oxidation of sulphides using a solid oxygen donor 50
3.1.3.4 Direct conversion of barium sulphate to sulphur dioxide 51
3.1.3.5 The purification and storage of sulphur dioxide 52
3.1.3.6 The preparation of sulphur hexafluoride 53
3.1.4 The mass spectrometric analysis of sulphur 54
3.2 Oxygen isotopes 55
3.2.1 Introduction 55
3.2.2 Sample collection 55
3.2.3 Sample preparation 55
3.2.3.1 Introduction 55
3.2.3.2 Sulphate 56
3.2.3.3 Water 58
3.2.3.4 SO_2 and O_2 59
3.2.4 The mass spectrometric analysis of oxygen 59

Chapter 4 Lithospheric Sources of Sulphur 65
H. Nielsen, J. Pilot, L.N. Grinenko, V.A. Grinenko, A. Yu. Lein, J.W. Smith, and R.G.Pankina
4.1 Sulphur in the cosmos and the crust–mantle system 65
4.2 Sulphur and oxygen isotope composition of marine evaporite and barite strata 68
4.2.1 Introduction 68
4.2.2 Compilation of $\delta^{34}S$ and $\delta^{18}O$ data for marine evaporites 69
4.2.2.1 General remarks on the data 69
4.2.2.2 Description of the $\delta^{34}S$– and $\delta^{18}O$–age curves 82
4.2.2.3 Minima and abrupt rises in the $\delta^{34}S$–age curve 85
4.2.2.4 Non-marine evaporites 86
4.2.3 Data from marine barites 86
4.2.4 Reservoir of evaporite sulphur 86
4.3 Isotopic composition of sulphur in sulphide ores 87
4.4 Native elemental sulphur deposits 91
4.5 Sulphur isotope composition of fossil fuels 95
4.5.1 Peat and lignite 95
4.5.2 Coal 96
4.5.3 Oil 100
4.5.3.1 Introduction 100

4.5.3.2 Summary of $\delta^{34}S$ data for oil 100
4.5.3.3 Estimate of the mean $\delta^{34}S$ value of oil 107
4.5.3.4 Use of sulphur isotope analyses to determine petroleum contamination in sediments 108
4.5.4 H_2S in hydrocarbon deposits 109
4.6 Flux of volcanogenic sulphur to the atmosphere and isotopic composition of total sulphur 116
4.6.1 Volcanogenic sulphur flux to the atmosphere 116
4.6.2 Isotopic composition of volcanogenic sulphur 119
4.6.2.1 Isotopic composition of gases emitted to the atmosphere during eruption 120
4.6.2.2 Isotopic composition of ash emitted to the atmosphere during eruptions 120
4.6.2.3 The sulphur isotope composition of gaseous emissions from fumaroles and solfataras 121
4.6.3 The isotopic composition of total volcanic sulphur entering the atmosphere 124

Chapter 5 Sulphur Isotope Variations in the Atmosphere 133
L. Newman, H.R. Krouse, and V. A. Grinenko
5.1 Introduction 133
5.2 Sulphur species in the atmosphere 133
5.2.1 Atmospheric S compounds and their concentrations 133
5.2.2 The atmospheric chemistry of sulphur 134
5.2.2.1 H_2S oxidation 134
5.2.2.2 S^O dust 135
5.2.2.3 SO_2 chemistry 135
5.3 Analytical techniques 137
5.3.1 Sampling of atmospheric S compounds 137
5.3.2 Further characterization of atmospheric compounds for sulphur isotope analyses 138
5.3.2.1 Wind direction 138
5.3.2.2 Particle size 140
5.3.2.3 Photographic examination of particles 141
5.3.2.4 Endogenous versus adsorbed sulphur 142
5.3.3 The use of sulphur isotope data from vegetation and soils 142
5.4 Sulphur isotope abundance variations in atmospheric compounds 143
5.4.1 Fractionation of sulphur isotopes during transformations of atmospheric sulphur compounds 143

5.4.2 Natural sources 144
5.4.2.1 Sea spray and marine aerosols 144
5.4.2.2 Biogenic emissions 146
5.4.2.3 Volcanic activity 147
5.4.3 Anthropogenic sources 148
5.4.3.1 Combustion of coal 148
5.4.3.2 Combustion and refining of oil and gas 148
5.4.3.3 Sulphide ores 148
5.4.3.4 Gypsum mining and processing 149
5.4.4 Summary 149
5.5 Delineation of anthropogenic and natural fluxes of atmospheric S compounds 152
5.5.1 Use of $\delta^{34}S$ and concentration data to identify sources of atmospheric gases 152
5.5.2 Use of $\delta^{34}S$ and concentration data to identify sources of SO_4^{2-} in precipitation 157
5.5.3 Use of $\delta^{18}O$ and concentration data to identify sources of SO_4^{2-} in precipitation 157
5.5.4 Isotopic delineation of sources of sulphur emissions in local situations 158
5.5.5 Construction of regional balances of atmospheric sulphur 159
5.5.6 Estimate of the isotopic composition of biogenic sulphur in the atmosphere 163
5.6 Potential of using enriched sulphur isotopes for studying transport, transformations, and removal of atmospheric sulphur 168
5.6.1 Introduction 168
5.6.2 Background fluctuations 168
5.6.3 Dispersion and dilution 169
5.6.4 Economic evaluation 170

Chapter 6 Hydrosphere **177**
J.O. Nriagu, C.E. Rees, V.L. Mekhtiyeva, A. Yu. Lein, P. Fritz, R.J. Drimmie, R.G. Pankina, B.W. Robinson, and H.R. Krouse
6.1 Introduction 177
6.2 Oceans 178
6.2.1 Dissolved sulphate 178
6.2.2 Sulphur of aquatic organisms 183
6.3 Modern world sediments 189
6.3.1 Intensity of sulphate reduction 189
6.3.2 Rate of bacterial sulphate reduction and other factors influencing the distribution of sulphur

compounds and their $\delta^{34}S$ values in recent sediments 193
6.3.3 Mass and isotopic balance of sulphur in recent sediments 196
6.3.4 Influence of the rate of sulphate reduction on sulphide mineral formation 197
6.4 Lakes 198
6.4.1 Lakes: water column 198
6.4.1.1 Isotopic changes due to lake pollution 198
6.4.1.2 Oligotrophic lakes 204
6.4.1.3 Eutrophic lakes 205
6.4.1.4 Meromictic lakes 207
6.4.2 Lakes: sediments 211
6.4.2.1 Anthropogenic influence on the isotopic composition of sulphur in lake sediments of eastern North America 211
6.5 Isotopic composition of sulphur in continental seas 217
6.5.1 The Black Sea 217
6.5.2 The Azov Sea 219
6.5.3 The Caspian Sea 220
6.5.4 The Baltic Sea 222
6.5.5 The Red Sea 223
6.5.6 Conclusion 224
6.6 Rivers 225
6.7 Ground water 229
6.7.1 Introduction 229
6.7.2 The recharge environment 230
6.7.3 Ground water 236
6.8 Isotopic composition of sulphate in gas- and oilfield formation waters 242
6.9 Geothermal areas 245
6.10 Warm and cold springs 247
6.10.1 Introduction 247
6.10.2 Springs containing primarily dissolved sulphate 247
6.10.3 Springs containing primarily dissolved sulphide 249
6.10.4 Sulphur geochemistry of springs in relation to anthropogenic sulphur 250
6.11 Summary and key areas for further research 250

Chapter 7 Pedosphere and Biosphere **267**
H.R. Krouse, J.W.B. Stewart and V.A. Grinenko
7.1 Pedosphere 267
7.1.1 Forms of sulphur in soil 267
7.1.1.1 Inorganic sulphur 267

7.1.1.2 Organic sulphur 268
7.1.1.3 Transformations of sulphur in soils 271
7.1.2 Sources of sulphur compounds in soil 271
7.1.3 Sulphur and oxygen isotope variations in soil 272
7.1.4 Relationships among $\delta^{34}S$ values of different soil extracts 277
7.1.5 Transfer of sulphur into the soil as revealed by sulphur isotope data 280
7.2 Vegetation 282
7.2.1 Forms of sulphur in vegetation 282
7.2.2 Sulphur isotope distribution in vegetation 283
7.2.3 Assimilation of sulphate by plants and algae 285
7.2.4 Uptake of sulphide by plants and algae 289
7.2.5 Relative incorporation of soil and atmospheric sulphur by vegetation 290
7.2.6 The influence of biological parameters on the sulphur isotope composition of plants 296
7.2.7 Emission of reduced sulphur compounds by vegetation 297
7.3 Food webs and higher animals 299

Chapter 8 Case Studies and Potential Applications 307
H.R. Krouse, L.N. Grinenko, V.A. Grinenko, L. Newman, J. Forrest, N. Nakai, Y. Tsuji, T. Yatsumimi, V. Takeuchi, B.W. Robinson, M.K. Stewart, A. Gunatilaka, L.A. (Chambers) Plumb, J.W. Smith, F. Buzek, J. Cerny, J. Sramek, A.G. Menon, G.V.A. Iyer, V. S. Venkatasubramanian, B.E.C. Egboka, M.M. Irogbenachi, and C.A. Eligwe
8.1 Introduction 307
8.2 Sulphur isotope tracing of the fate of emissions from sour gas processing in Alberta, Canada 309
8.2.1 Overview 309
8.2.2 The sour gas industry of Alberta 309
8.2.3 Sulphur isotope composition of the atmosphere in Alberta 312
8.2.3.1 Regional pattern 312
8.2.3.2 Relationship of $\delta^{34}S$ to concentrations of atmospheric S compounds 314
8.2.3.3 Dependence of $\delta^{34}S$ values of atmospheric S on wind direction 315
8.2.3.4 Isotopic composition of atmospheric particulate matter 316

8.2.4 Sulphur isotope composition of surface waters 317
8.2.5 Sulphur isotope abundances in soils and vegetation of Alberta 318
8.2.6 Isotopic modelling of uptake of industrial S by the environment near sour gas processing plants in Alberta 320
8.2.7 Discussion and recommendations 323
8.3 The isotopic composition and content of sulphur in soils of Kansk-Achinsk fuel power generation complex 327
8.3.1 Introduction 327
8.3.2 Results 327
8.3.3 Conclusion 331
8.4 Sulphur isotope measurements relevant to power plant emissions in the northeastern United States 331
8.4.1 Introduction 331
8.4.2 Fuels in use 332
8.4.3 Sulphur isotope compositions of ambient ground-level SO_2 and sulphate 333
8.4.4 Available fuels and other sources 338
8.4.5 Conclusions 343
8.5 Environmental sulphur isotope studies in Japan 343
8.5.1 Introduction 343
8.5.2 The quantity and sulphur isotopic composition of hydrogen sulphide released from tidal flats 344
8.5.2.1 Sampling 344
8.5.2.2 Observations and discussion 344
8.5.3 Secondary production in sulphuric acid from volcanic ash in surface water after a volcanic eruption 347
8.5.3.1 Introduction 347
8.5.3.2 Results and discussion 348
8.5.4 Sources of atmospheric sulphur compounds based on the sulphur isotopic composition of SO_4^{2-} in precipitation in Japan, 1960–79 352
8.5.4.1 Introduction 352
8.5.4.2 Atmospheric SO_2 and H_2S and pH of precipitation in Japan 353
8.5.4.3 Sulphur isotopic composition of SO_4^{2-} in rain and snow in Japan 355
8.5.5 Estimation of the contribution of anthropogenic sulphur to the atmosphere in Japan 358
8.6 The use of sulphur and other stable isotopes in environmental studies of regional groundwater flow and sulphate mineral formation in Kuwait 361

8.6.1 Introduction 361
8.6.2 Geological setting 363
8.6.3 Sampling and analytical techniques 365
8.6.4 Isotopic composition of the waters 365
8.6.5 Isotopic composition of the sulphate 369
8.6.6 Conclusions 371
8.7 Natural sulphur isotope distributions for sulphate and sulphides in semi-arid, marginal marine environments in Australia 371
8.7.1 Introduction 371
8.7.2 Study sites 372
8.7.2.1 Spencer Gulf, South Australia 372
8.7.2.2 Shark Bay, Western Australia 372
8.7.3 Isotope data for water and sulphates 373
8.7.3.1 Continental waters, Spencer Gulf 377
8.7.3.2 Pertidal waters, Spencer Gulf 377
8.7.3.3 Shark Bay 379
8.7.4 Isotope distribution in peritidal sulphides 382
8.7.5 Summary 385
8.8 Contributions to sulphur to the atmosphere from utilization of fossil fuels, Australia 385
8.8.1 Coals 385
8.8.2 Crudes and condensates 387
8.8.3 Natural gases 391
8.8.4 Oil shales 391
8.8.5 Isotopic composition and fate of sulphur mined in Australia with copper, lead, zinc, and nickel ores 391
8.9 Sulphur isotope studies of atmospheric S and the corrosion of monuments in Prague, Czechoslovakia 399
8.9.1 Introduction 399
8.9.2 Analytical 400
8.9.3 Results and discussion 400
8.9.3.1 Atmospheric studies 400
8.9.3.2 Stone monuments 403
8.10 Determination of total sulphur $\delta^{34}S$ values in ore deposits of the Precambrian of India 405
8.10.1 Overview 405
8.10.2 Introduction 405
8.10.3 Sulphur isotope data and estimation of ore solution parameters 406
8.10.4 Trace elements in the evaluation of $\delta^{34}S_{total}$ 408
8.10.5 Conclusions 409
8.11 Potential research areas for sulphur isotope geochemistry in Nigeria 409

8.11.1 Introduction 409
8.11.2 Research areas in Nigeria 411
8.11.3 Stable sulphur isotopes in basic geochemical research 411
8.11.3.1 Basement complex rocks 411
8.11.3.2 Lead–zinc mineralization and salt deposits 413
8.11.3.3 Agulu–Nanka gully complex sulphur deposits 413
8.11.4 Fossil fuel deposits 413
8.11.4.1 Coal and mine drainage 414
8.11.4.2 Petroleum and natural gas 415
8.11.4.3 Oil shales and tar sands 416
8.11.5 Emission of sulphur 416
8.11.6 Other research areas 416

Appendix **423**

Chapter 9 Summary **427**
H.R. Krouse and V.A. Grinenko

Index **431**
