<b>Preface</b>	<b>xvii</b>
<b>List of Workshop Participants and Contributors to the Volume</b>	<b>xxii</b>
<b>1 Small Catchment Research</b>	<b>1</b>
<i>Bedřich Moldan and Jiří Černý with contributions from all chapters</i>	
1.1 Introduction	1
1.1.1 Natural Factors Influencing Small Catchments	3
1.1.2 Anthropogenic Factors Influencing Small Catchments	4
1.1.3 Events	4
1.1.4 Measurements in Small Catchments	5
1.1.5 Modelling	7
1.2 Small Catchment Programmes	8
1.3 Important Scientific Findings	9
1.3.1 Hydrology	9
1.3.2 Atmospheric Deposition	11
1.3.3 Geology, Weathering and Erosion Processes	11
1.3.4 Soil Science	13
1.3.5 Biology	14
1.3.6 Forestry	14
1.3.7 Element Budgets	16
1.3.8 Short-, Medium- and Long-term Changes	19
1.4 Manipulation Experiments	20
1.5 Environmental Problems Studied in Small Catchments	22
Considerations for the Future	23
1.7 Suggested Reading	24
1.8 References	24
<b>2 Hydrology</b>	<b>31</b>
<i>Alan Jenkins, Norman E. Peters and Allan Rodhe</i>	
2.1 Introduction	31
2.2 The Catchment as a Study Unit	31
2.3 Streamflow Generation Mechanisms	35
2.3.1 Conceptual Approaches	35
2.3.2 Mathematical Modelling	37

2.4	Methodology for Computing a Water Balance	40
2.4.1	Data Collection	40
2.4.1.1	Precipitation	40
2.4.1.2	Streamflow	41
2.4.1.3	Soil moisture	42
2.4.1.4	Groundwater	43
2.4.2	Tracer Hydrology	44
2.4.2.1	Stable isotopes of oxygen and hydrogen	45
2.4.2.2	Tritium	45
2.4.2.3	Chemical tracers	46
2.4.2.4	Temperature	46
2.5	Data Analysis Techniques	47
2.5.1	Hydrograph Analysis	47
2.5.2	Graphical Hydrograph Separation	48
2.5.3	Hydrograph Separation Using Tracers	48
2.6	Summary	50
2.7	Suggested Reading	50
2.8	References	50
<b>3</b>	<b>Atmospheric Chemical Input to Small Catchments</b>	<b>55</b>
	<i>Howard B. Ross and Steven E. Lindberg</i>	
3.1	Introduction	55
3.2	Factors Influencing Chemical Inputs	55
3.2.1	Wet Deposition	56
3.2.2	Cloud Deposition	60
3.2.3	Dry Deposition	62
3.3	Methods for the Quantification of Inputs to Small Catchments	66
3.3.1	Biomonitors	69
3.3.2	Foliar Extraction	70
3.3.3	Throughfall Methods	70
3.3.4	Mass Balance Studies of Sulphur	76
3.4	Conclusions	77
3.5	Suggested Reading	78
3.6	References	78
<b>4</b>	<b>Weathering and Erosion Aspects of Small Catchment Research</b>	<b>85</b>
	<i>Owen P. Bricker, Tomáš Pačes, Chris E. Johnson and Harald Sverdrup</i>	
4.1	Introduction	85
4.2	Role of Weathering and Erosion in Ecosystems	85
4.3	Weathering and Erosion Processes	88
4.3.1	Mechanisms and Kinetics	91
4.3.2	Modelling	94
4.3.2.1	Weathering in biogeochemical models	95

4.3.2.2 Detailed weathering models (PROFILE)	97
4.4 Methods Used to Determine Rates of Weathering and Erosion	98
4.4.1 Estimation of Weathering Rates	98
4.4.1.1 Discrepancy in mass balance	98
4.4.1.2 Indicator elements (Na, Si)	99
4.4.1.3 Soil profile depletion	99
4.4.1.4 Sr isotopes	99
4.4.1.5 Weathering bags	100
4.4.1.6 Laboratory experiments	100
4.4.2 Estimation of Erosion Rates	100
4.5 Summary	101
4.6 Suggested Reading	101
4.7 References	102
<b>5 Soil and Soil Solution Chemistry</b>	<b>107</b>
<i>Jan Mulder and Malcolm S. Cresser</i>	
5.1 Soil Chemical Reactions	107
5.1.1 Introduction	107
5.1.2 Reactions Involving Inorganic Carbon	110
5.1.3 Reactions Involving Organic Carbon	111
5.1.4 Cation Exchange Reactions	112
5.1.5 Sulphate Transport and Adsorption	114
5.1.6 Phosphate Transport and Adsorption	115
5.1.7 Reactions Involving Aluminium	116
5.1.8 Chemical Weathering	117
5.1.9 Nitrogen Transport	117
5.2 Spatial and Temporal Variability of the Soil	118
5.2.1 Horizons: Vertical Variability in Chemistry	118
5.2.2 Soil Types: Lateral Patterns (Catena)	119
5.2.3 Temporal Patterns in Soil Chemistry	120
5.2.3.1 Soil solution	120
5.2.3.2 Soil solid phase	120
5.3 Anthropogenic Impact on Soils and Subsequent Recovery	121
5.3.1 Anthropogenic Impact and Resulting Changes	121
5.3.2 Recovery from Soil Disturbance	122
5.4 Methods in the Study of Soil and Soil Water	122
5.4.1 Soil Survey, Sampling and Analysis	122
5.4.1.1 Soil survey	122
5.4.2 Soil Water and Groundwater Collection	124
5.4.3 Chemical Analysis of Solutions	125
5.5 Summary	125
5.6 Further Reading	126
5.7 References	126

<b>6</b>	<b>Biological Processes and Catchment Studies</b>	<b>133</b>
	<i>Bengt J. Nilgård, Wayne T. Swank and Myron J. Mitchell,</i>	
6.1	Introduction	133
6.2	Long-term Changes in Catchments	134
6.2.1	Palaeoecological Studies	134
6.2.2	Long-term Monitoring	135
6.3	Primary Productivity and Nutrient Cycling in Catchments	136
6.4	Microbial Regulation in Catchments	140
6.4.1	Nitrogen	141
6.4.2	Sulphur	144
6.4.3	Phosphorus	146
6.4.4	Carbon	147
6.5	Within-stream Biological Factors	148
6.6	Herbivore Effects	151
6.6.1	Insects	151
6.6.2	Large Mammals	152
6.7	Conclusions and Recommendations	153
6.8	Suggested Reading	154
6.9	References	155
<b>7</b>	<b>Hydrochemical Methods and Relationships for Study of Stream Output from Small Catchments</b>	<b>163</b>
	<i>Raymond G. Semkin, Dean S. Jeffries and Thomas A. Clair</i>	
7.1	Basic Hydrochemical Concepts	163
7.1.1	Purpose of Hydrochemical Investigations	163
7.1.2	Streamwater Chemistry	164
7.1.2.1	Dissolved substances	164
7.1.2.2	Suspended substances	167
7.1.2.3	Composite parameters	169
7.1.3	Streamwater Chemistry Variability	169
7.1.3.1	Temporal variability	169
7.1.3.2	Spatial variability	171
7.1.4	Stream Output from Catchments	172
7.1.4.1	Sampling frequency	172
7.1.4.2	Mass balance/loading calculations	174
7.2	Methods for Quantitative Observation	176
7.2.1	Stream Discharge	176
7.2.2	Suspended Sediment Sampling	177
7.2.3	Dissolved Substances Sampling	178
7.3	Interpretation of Hydrochemical Data	180
7.4	Summary	184
7.5	Suggested Reading	184
7.6	References	184

CONTENTS	xi
<b>8 Element Budgets</b>	<b>189</b>
<i>Jiří Černý, Michael F. Billett and Malcolm S. Cresser</i>	
8.1 Introduction	189
8.2 Input–Output Budgets	189
8.3 Selection of Watersheds for Small Watershed Studies and Practical Considerations	193
8.4 Development of Watershed Element Budgets	195
8.4.1 Atmospheric Deposition and Throughfall Inputs	195
8.4.2 Soil and Biomass Pools and Transfers	197
8.4.3 Stream Export of Elements	198
8.4.4 Other Fluxes	202
8.5 Summary	202
8.6 Suggested Reading	202
8.7 References	203
<b>9 Hydrologic Studies</b>	<b>207</b>
<i>Norman E. Peters</i>	
9.1 Introduction	207
9.2 Runoff Characteristics	208
9.2.1 Flow Duration	209
9.2.2 Recession-rate Analysis	211
9.2.3 Runoff Dynamics	214
9.2.4 Water Budget	215
9.2.5 Remote Sensing and Geographic Information Systems	217
9.3 Tracer Hydrology/Mixing Models	218
9.3.1 Natural and Artificial Tracers	218
9.3.2 Hydrograph Separation	219
9.4 Research Directions/Recommendations	223
9.5 References	223
<b>10 Sulphur</b>	<b>229</b>
<i>Hans Hultberg, Helene ApSimon, Robbins M. Church, Peringe Grennfelt, Myron J. Mitchell, Filip Moldan and Howard B. Ross</i>	
10.1 Introduction	229
10.1.1 The Global Sulphur Cycle and its Disturbance by Man	229
10.1.2 Sulphur in Ecosystems	231
10.1.3 Sulphur Studies in Europe and North America	232
10.2 Atmospheric Input to Catchments	233
10.2.1 Chemical Forms and Mechanisms of Deposition	233
10.2.2 Quantification of Sulphur Deposition	236
10.2.3 Factors Influencing Sulphur Deposition	237
10.2.4 Regional Dry Deposition	239
10.3 Cycling in Soils	240

10.3.1 Adsorption/Desorption in Soils	240
10.3.2 Biomass Accumulation	240
10.3.3 Gaseous Emissions	241
10.3.4 Leaching of Nutrients	241
10.4 Acidification	242
10.4.1 Critical Loads	242
10.4.2 Modelling Soils and Streamwater Chemistry	244
10.4.3 Long-term Studies	245
10.5 Whole Ecosystem Manipulations	246
10.6 Summary and Research Recommendations	248
10.7 References	249
<b>11 Nitrogen Cycling</b>	<b>255</b>
<i>Per Gundersen and Vladimir N. Bashkin</i>	
11.1 Introduction	255
11.2 Forested Catchments	256
11.2.1 Environmental Problems Related to Nitrogen	256
11.2.2 Nitrogen Saturation	257
11.2.3 Interactions in the Forest Nitrogen Cycle	258
11.2.4 Critical Parameters for Nitrogen Saturation	262
11.2.5 Elevated Nitrogen Leaching and its Causes	265
11.2.6 Denitrification and Nitrous Oxide Emissions	268
11.2.7 Conclusions and Research Recommendations	268
11.3 Agricultural Catchments	269
11.3.1 Crop Uptake and Accumulation	271
11.3.2 Export of Nitrogen	272
11.3.3 Leaching and Runoff	273
11.3.4 Mixed Catchments	275
11.4 Summary	276
11.5 References	277
<b>12 Hydrochemical Studies</b>	<b>285</b>
<i>Nils Christophersen, Thomas A. Clair, Charles T. Driscoll, Dean S. Jeffries, Colin Neal and Raymond G. Semkin</i>	
12.1 Introduction	285
12.2 Carbon Cycling and DOC	286
12.2.1 Carbon Budget for Hubbard Brook	286
12.2.2 Dissolved Organic Carbon at Two Sites in Nova Scotia	288
12.3 Episodic Changes in Streamwater Chemistry	289
12.3.1 Case Studies	289
12.3.2 The Importance of Flow Paths	292
12.4 Mathematical Models	293
12.5 Conclusions	295
12.6 References	295

<b>13 Trace Metals Speciation and Cycling</b>	<b>299</b>
<i>Charles T. Driscoll, James K. Otton and Åke Iverfeldt</i>	
13.1 Introduction	299
13.2 Case Studies—Mercury, Lead, Aluminium and Uranium	306
13.2.1 Hg Cycling at Gårdsjön Lake	306
13.2.1.1 Site description and approach	306
13.2.1.2 Results and discussion of the Hg cycle	307
13.2.2 The Pb and Al Cycle at Hubbard Brook, NH, USA	310
13.2.2.1 Site description and approach	311
13.2.2.2 Results and discussion of the Pb cycle	313
13.2.2.3 Results and discussion of the Al cycle	315
13.2.3 Uranium Cycle at Flodelle Creek, Washington, USA	316
13.2.3.1 Site description and approach	316
13.2.3.2 Results and discussion of the U cycle	317
13.3 Recommendations for Future Research	318
13.4 References	318
<b>14 Chemical Weathering in Small Catchments: Climatic and Anthropogenic Influences</b>	<b>323</b>
<i>Chris E. Johnson, M. Iggy Litaor, Michael F. Billett and Owen P. Bricker</i>	
14.1 Introduction	323
14.2 Climatic Influences on Chemical Weathering	324
14.2.1 Alpine and Subalpine Environments	324
14.2.2 Northern Temperate Environments	324
14.2.3 The Tropics	325
14.3 Effects of Human Activities	328
14.3.1 Estimates of Long-term Chemical Weathering Rates	328
14.3.2 Acid Deposition and Present-day Weathering Rates	330
14.3.3 Managed Forest Catchments	334
14.3.4 Agricultural Systems	335
14.4 Need For Future Research	336
14.5 References	337
<b>15 Small Catchment Studies In Tropical Zone</b>	<b>343</b>
<i>Teresa Vegas-Vilarrúbia, Manuel Maass, Valentí Rull, Václav Eliás, Alvaro Ramon Coelho Ovalle, Danilo Lopez, Gerhart Schneider, Pedro J. Depetris and Ian Douglas</i>	
15.1 Introduction	343
15.2 Main Ecosystem Disturbances and Usefulness of Small Catchment Studies	344
15.2.1 Deforestation	344
15.2.2 Burning	344

15.2.3	Mining	345
15.2.4	Acidification	345
15.2.5	Heavy Metal Mobilization	346
15.3	Case Studies	346
15.3.1	The Chamela Watershed Project: a Study of the Structure and Functioning of a Tropical Deciduous Forest in West Mexico	347
15.3.2	Effects of Climate and Fire on Small Catchment Ecosystems in SE Venezuela	348
15.3.3	Effect of Diking on Small Catchment Ecosystems in Venezuelan Flooded Savannas	348
15.3.4	A Small Catchment Study in the Brazilian Tropics	350
15.3.5	Effect of Storm Events on Stream Chemistry in an Atlantic Brazilian Coastal Forest	352
15.3.6	Research on Erosion and Carbon Export in Small Catchments	352
15.3.7	Effects of Logging on Malaysian Rainforest	353
15.4	Constraints of the Small Catchment Studies in Latin America	356
15.4.1	Ecological Constraints	356
15.4.2	Technical and Socioeconomical Constraints	356
15.5	Conclusions and Recommendations	357
15.5.1	Small Catchments Modelling Versus Large Catchments	357
15.5.2	First Disturbance Testing	357
15.5.3	Awareness and Scientific Cooperation	358
15.6	References	358
<b>16</b>	<b>Agricultural Impacts in the Northern Temperate Zone</b>	<b>361</b>
	<i>Rein Ratsep, Bengt Nihlgård, Vladimir N. Bashkin, Pavel Blazka, Bridget Emmet, Jim Harris and Marek Kruk</i>	
16.1	Introduction	361
16.1.1	Agroecosystems and Catchment Studies	361
16.2	Soil Physical Management	364
16.2.1	Effect of Different Tillage Practices	364
16.3	Chemical Management	366
16.3.1	Main Nutrients: Nitrogen and Phosphorus	367
16.3.2	Pesticides	369
16.4	Biological Management	369
16.5	Water Management	372
16.6	Industrial Effects	373
16.6.1	Physical Disruption	373
16.6.2	Chemical Contamination	374
16.7	Landscape Planning and Optimization	375
16.8	Summary	377
16.9	References	378

<b>17 Small Catchment Research in the Evaluation and Development of Forest Management Practices</b>	<b>383</b>
<i>Wayne T. Swank and Chris E. Johnson</i>	
17.1 Introduction	383
17.2 Historical Background	383
17.3 Conceptual Considerations	384
17.4 Select Examples of Approaches	386
17.4.1 Water Yield and Timing of Streamflow	386
17.4.1.1 General	386
17.4.1.2 Regional examples	387
17.4.1.3 Hydrologic models	390
17.4.1.4 Timing of streamflow	391
17.4.2 Water Quality	392
17.4.2.1 Sedimentation	394
17.4.2.2 Stream temperature	395
17.4.2.3 Dissolved nutrients	395
17.4.3 Element Cycling	396
17.4.3.1 Case study: Hubbard Brook	398
17.4.3.2 Factors influencing element export and depletion	401
17.4.3.3 Tropical vs. temperate systems	403
17.5 Research Needs and Opportunities	404
17.6 References	404
<b>Index</b>	<b>409</b>
